

insparx GmbH is a service center for a group of very successful internet companies and start-ups.

From its head office in Munich insparx GmbH currently supports 9 partner companies in (Online) Marketing, Customer Relationship Management, Customer Service, Finance, HR and Business Intelligence.

insparx' s team of more than 100 people from over 40 nationalities operates in 35 countries and 17 languages.

insparx has been instrumental to the fast, efficient and profitable internationalization of several businesses. Working with insparx, our partners have seen rapid and profitable growth, successfully establishing themselves globally.

We are recruiting for our partner company C-date (www.c-date.com), a very successful company in the casual dating market.

Become part of this success story and join the team in the centre of **Munich, Germany** as

Java Backend Developer (m/f)

You will be responsible for developing high performance n-tier applications for our product C-date. You integrate partner interfaces into existing software architectures and maintain and improve the existing software. Web services and modern software-modules are your daily business and you love the technical discussions with your colleagues. Being up to date on latest technologies in your special field and evaluating them is a matter of course for you.

Your tasks & responsibilities

- Development in a large scale and distributed environment
- Programming, testing and documenting the development of the back-end of our web application
- Process optimization and code profiling
- Conducting integration testing / QA
- Integration of partner interfaces into our existing architecture
- Providing analysis documentation during project lifecycle
- Evaluating new technology and making recommendations for adoption
- Working in an agile development environment delivering business software solutions to agreed standards and timelines

Your profile

- Several years experience in developing applications using the Java core APIs
- Knowledge of design patterns and their usage
- Good knowledge of SQL / PSQL; TCP/IP-Stack; OOD/OOA; JSP/Servlet-Spec; Ant buildscripts; Spring; Struts; Tomcat / Glassfish; UML; EJB 3.x; JUnit
- Meticulous, with very strong analytical and problem-solving skills especially with respect to identifying root causes
- Detail oriented and extremely organized, with proven ability to establish priorities and achieve results
- Ability to solve practical problems and deal with a range of variables in situations where only limited standardization exists
- Ability to integrate within an existing team and adapt to the organization in place
- Good command of English

Our offer

We can offer you the chance to join a leading internet company located right in the heart of Munich. You will be working in an entrepreneurial, results driven environment where decision making fast and flat hierarchical structures ensure your ideas are heard, and you quickly have the opportunity to assume responsibilities and grow professionally. Our office houses very international, dynamic and sociable teams that are often getting together for staff dinners, parties and days out as well as working hard to drive the success of C-date.

Interested?

Please send your application to **Kathleen Matthes** at jobs@insparx.com, referring to the job title above. Please include educational certificates, work references, your possible starting date and your salary expectations.
