

Join our creative and dynamic, international team as a:

(Junior) Technical Product Manager - Payment (m/f/x)

Harness your technical, organizational and people skills in this diverse role. You'll support the management of our technical payment systems which are vital to our success, organize implementation of new solutions and monitor performance. Our premium dating sites boast over 50 million members worldwide, ensuring a responsive, agile and international working environment.

Who we are

- A global leader in premium online dating.
- We have multiple premium products in over 30 countries
- We are a team of over 150 people from 40 different nations with English as our working language
- We have a flat hierarchy and focus on getting the right things done together

What we offer

- State-of-the-art data technologies
- Interesting and varied tools and interfaces
- The perfect balance of autonomy and support
- Strong potential to make an impact
- A fun and truly international working environment
- Germany based, fully remote
- Brand new hub at Heimeran Tower in Munich with panoramic skyline views

Your role

- Coordinate the implementation of payment solutions & technologies
- Manage the end-to-end product development lifecycle from concept to launch
- Engage with external stakeholders to gather insights and feedback
- Work closely with cross-functional teams to deliver high-quality payment solutions
- Define KPIs to track product / integration performance.
- Analyse payment data to identify areas for improvement
- Document new implementations and processes

You

- (First) Experience in technical project management, preferably some development experience, you are currently at junior to mid-level
- Strong logical and analytical thinking with experience in data analysis
- Ability to understand and interpret technical documentation
- (First) Experience with product management tools and software (e.g. JIRA)
- Very good communication skills, a team worker
- Experience with SQL, Microsoft Excel, Tableau (nice to have)
- Ability to work effectively in a fast-paced, collaborative environment
